EVERGREENS THAT LIVE

**WEDGE
NURSERY**

FRUIT TREES THAT BEAR

PRICE LIST
UNTIL MAY 15, 1920

ALBERT LEA, MINNESOTA.

NOTICE TO SALESMEN

This price-list has been made up for the convenience of the salesman and for the best good of the fruit grower. Instead of offering a long list of varieties we have selected only those known to be successful in the regions we aim to cover and in heavy black faced type we show the fruits which we know to be especially desirable to northern planters.

The prices herein are for high quality nurseries stock of our own growing and with the guarantee that we will replace at one-half price all stock dying out of the ground two years after planting. No reductions in price are allowed except in orders of \$100.00 or more on which we give a 5% discount.

Raspberries, Red	3 by 4 "
Raspberries, Black	3 by 6 "
Blackberries and Dewberries	3 by 6 "
Strawberries, rows	1 by 3½ "
Asparagus	1 by 3 "

BASIS OF SCALE

6	of any article at	12 rate
50	of any article at	100 rate
500	of any article at	1000 rate

TABLE SHOWING THE NUMBER OF TREES OR PLANTS REQUIRED TO SET AN ACRE.

The following table shows the number of trees or plants required to fill an acre of ground when planted at the given distances apart.

Dist. Between Plants	No. Plants or Trees
30 X 30	49
25 X 25	70
20 X 20	109
15 X 15	435
10 X 10	907
8 X 8	2904
6 X 6	5445
5 X 5	6222
4 X 4	72
3 X 3	87
2 X 2	145
1 X 1	680
1/2 X 1/2	2074
1/3 X 1/3	2178
1/4 X 1/4	7260

RULE TO FIND THE NUMBER OF PLANTS OR TREES REQUIRED FOR AN ACRE.

The number of square feet in an acre is 43,560. Divide this by the number of square feet required for each plant.

To find how many currants required for an acre planted 4 feet by 6 feet, 4 times 6 feet equals 24 square feet. 43,560 divided by 24 equals 1815 - the number of currants for an acre.
